

CRITICAL CARE TRANSPORT

Difficult Airway Lab, Rapid Sequence Intubation Lab

and Initial Ventilator Management

with Dr. Peter Goth of CCTI

JULY 16TH
8:30AM - 4:30 PM

This course is designed to train critical care team members to work together while intubating a patient, building hands-on skills and understanding difficult airway procedures and techniques for success. Team members will practice RSI (Rapid Sequence Intubation) techniques on very difficult/ trauma airways. Initial Ventilator Management (IVM) concepts, including protective and obstructive strategies, pharmacology of ventilator management, common problems and solutions and IVM decisions will be reinforced using interactive case studies.

\$345 for RN & Transport Providers

\$605 for Physicians and Mid-Level Providers.
